

# agenda

9.00- 9.50:

F. Zonca: "The fishbone paradigm and the beam plasma system" with contributions from N. Carlevaro and G. Montani

9.50-10.30:

Z. Lu: Study of EP driven Alfvén eigenmode using theoretical tools and ORB5

10:30-10.50: coffee break

10.50- 11.20:

A. Biancalani: "WVP4 (global modes with turbulence and EP, with ORB5): main results of 2017, and plans for 2018" with contributions from A. Bottino, N. Carlevaro, A. Di Siena, A. Mishchenko, I. Novikau, F. Vannini and D. Zarzoso

11:20 -12.10:

Ph. Lauber: Update on NAT related AUG experiments and planned WVP6 activities, Kinetic GAM physics (LIGKA) for AUG experiments, Progress on HAGIS wave-wave model (WVP2)

12.10 -12.30:

General discussion, other informal updates, planning for 2018 collaborations and related travel, conferences in 2018 etc...
